

Deluxe H-60 Bridge Tool Kit

Deluxe H-60 Bridge Tool Kit (P/N 11280A01)

The Deluxe H-60 Bridge Tool Kit contains 18 specially-designed tools for the removal and installation of H-60 aircraft forward and aft bridge assembly components. With hands-on input from H-60 maintainers, these tools were purpose-built using materials and coatings to allow for zero maintenance-induced damage. Superior to conventional methods, the Bridge Tool Kit enables a significant reduction in maintenance man-hour labor and component damage risk when performing 5-pack transmission main module maintenance.

The result is sustainable process improvement over conventional methods—returning aircraft to mission readiness faster at a reduced cost.

Benefits:

- Improves maintainer effectiveness and efficiency
- Reduces total maintenance hours
- Protects aircraft components from maintenance-induced damage

Eccentric bushing removal

Aft bridge removal

Bellcrank sleeve removal
